Registrations by Mon 9th February via:

https://forms.gle/79UqMHR2bivMCma1A

Join us to learn about the Bass Coast multi species pastures demonstration project.

Hosted on the Almurta property of Janette and Andrew Allen, this is a 3-year demonstration looking at the cost/benefit of multi species pastures. The recently established demonstration is being actively supported by Jade Killoran from Healthy Farming Systems who will be attending this field day as guest speaker.

This field day will focus on:

- Introduction to the property vision and the integration of multi species pastures into farming systems
- Introduction to the demonstration site- demonstration site purpose, design and planning.
- Summary of works to date.
- Demonstration site farm walk and talk session facilitated by Jade Kiloran.

This will be a very informative and practical field day session and if you're thinking of further integrating multi species pastures into your farming systems we encourage you to attend.

A light lunch will be provided.

BYO- coffee mug and camp chair.
