

Bimbadeen Soil Carbon Demonstration Field Day.

Welcome to Bimbadeen, an innovative Philip Island property on a diversification journey. Landowner Bob Davie is also trialling cropping methods aimed to increase Bimbadeens soil carbon. Come along and learn about the methodology used by Bimbadeen to grow soil carbon, learn more about the soil carbon coring process and listen to Drift Media talk about the innovative use of new drone technology being trialled at Bimbadeen to monitor soil carbon indicators such as soil moisture and plant health.
