

WEBINAR, MAY 8, 2020

Join Declan McDonald to learn about soil health

Want to know more about the importance of soil health, how to integrate the use of compost and fertilizers, and how to incorporate compost into your soils?

Join us and hear from highly regarded Declan Mc Donald, who has over 30 years-experience in agricultural, horticultural, recreational and amenity soil management. Declan holds a degree in Horticulture (UTS) and gained a Master of Sustainable Agriculture (soils) from the University of Sydney, has worked for

numerous state governments, and is currently a senior soil scientist for SESL in Victoria.

He has authored and co-authored a number of publications on this topic including the inaugural chapter on soil biology for the Dairy Industry's Soils and Fertiliser Manual and *Soils Alive!*

Understanding and Managing Soil Biology on Tasmanian Farms.

This is a wonderful opportunity for home growers and farmers to gain the tools to improve soil, profitability and reduce plant stress from an industry expert, as well as have your questions answered by Declan.

WEBINAR DETAILS

Date: Friday May 8, 2020

Home Garden Soil Health 2:30 – 3:30pm

Soil Health for the paddock 4:00 – 5:00pm
