

# Future Homes and Farms for 2040

## Empowering people to adapt

### Water Management in a changing climate

#### Using landscape function to store and manage water.

Are you interested in learning more about on-farm water management in a changing climate? Do you want to work with your landscape and be better prepared for extreme rainfall events? Join us for this exciting field day where you will find out more about:

- What Southern Gippsland's future climate will look like, particularly focusing on rainfall and soil moisture with John Clarke from CSIRO.
- How you can manage your soils and landscape to increase soil moisture year-round with the Mulloon Institute.
- How to apply these concepts on farm with an afternoon farm walk at a typical Southern Gippsland grazing farm.

This is a field day not to be missed. We look forward to seeing you there!

### Event Details

**Date and time:** Monday 3<sup>rd</sup> May, 10.30am to 2.30pm.

**Time:** 10.30 am to 2.30pm.

**Venue:** Kernot Hall. Google maps link: <https://goo.gl/maps/7znqPyFt2ka2Pq8d8>
