

Future Homes and Farms for 2040

Empowering people to adapt

Diversity on farm in a changing climate.

Planning and managing for pasture and crop diversity in a changing climate- Webinar.

Are you interested in learning more about diversity on farm in a changing climate? Do you want to look at increasing your pasture and crop diversity as you aim to increase your farms resilience? Join us for this exciting webinar where you will find out more about:

- What climate resilient pasture and crop species you should be looking at that will contribute to increased soil organic matter and water holding capacity.
- What actions you should take prior to introducing new pasture and crop species onto your farm.
- What multiple benefits to your farm can you expect from introducing pasture and crop diversity.

Guest speakers include Niels Olsen and Chris Alenson.

Event Details

Date and time: Thursday 23rd September, 10.30am 12.30pm.
