

Wildlife monitoring utilizing Drones and Camera trapping Field day

Interested in using technology to monitor wildlife on your property?

Come along to a field day exploring different techniques and technologies available to undertake wildlife and flora monitoring. This day is part of the Kongwak, Korumburra, 3 Creeks and Bass Valley Landcare Groups Victorian State Government funded Threatened species projects.

Guest speakers include:

Matthew Lee from Uaviation Analytics who will explore the current and potential future capability of drones as a tool for data collection in the environmental sector.

As Australia experiences the rise of automation, we will see what positive influence this technology may have on preserving our natural assets.

Robbie Gray from BCLN will also be presenting on the results of BCLN's camera trapping program and how to install and best utilize infra-red camera traps on your property.

You will also be able to sign up to get instructions and to use the BCLN camera traps on the day.

Matthew Lee drone guru

Swamp Wallaby

Long nose bandicoot

Powerful Owl
